INDUSTRIES

## Allproof Industries will guide you through every step of

### Consultation

- On site or in office
- Expert knowledge
- Solution orientated

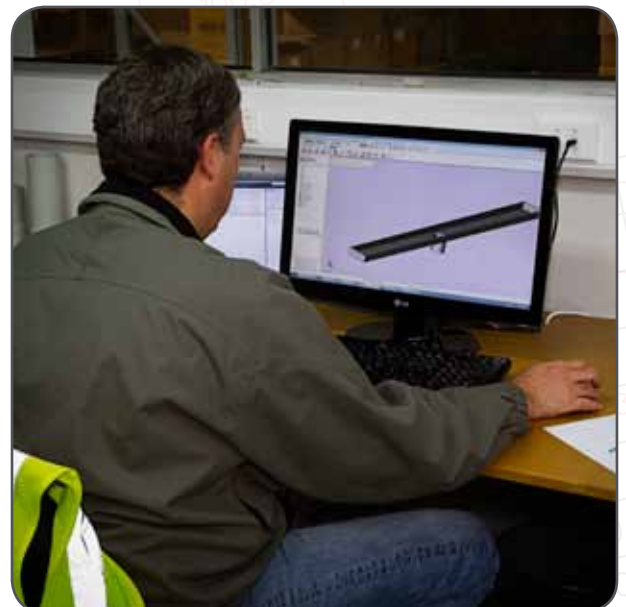

The first step of any project is gathering all the required information together. Our team is experienced in working with customers to help them meet both budget and time requirements. On site meetings and a high level of communication insures we understand exactly what it is that you are trying to achieve.

### Design

- Engineering expertise
- CAD Drawing Plans
- Design clarification

Once we have a firm understanding of what you are trying to achieve, we can get our design and engineering team onto turning the idea into a reality.

Using our expertise and experience, we will generate final drawings from our CAD Suite, working with you to make sure it is exactly what you are after.

# Specialist suppliers to the Plumbing and Drainage Industry

Allproof Industries Steel Workshop caters to the Stainless Steel manufacturing that has become a large part of Allproof's business, with more demand coming in every day. The production facility features the required machinery to create a vast range of stainless products and a team focused on working with these projects combines experience with enthusiasm.

Our involvement in many large stainless steel projects, ranging from the Britomart development through to the grandstands & kitchens at Eden Park has given us the experience to handle any sized job.

At the other end of the scale, custom designs for channel drains in high-end residential homes are also passing through the shop.

We also undertake jobs that require custom modification to existing products, and have dealt with everything from shower trays to display racks. Allproof has a focus on reducing turnaround time and optimising levels of communication at the various levels involved in the production process. Contact us to organise a representative to come visit and discuss your project requirements. We are here to help.

## of the process, from initial idea, through to realisation.

### Manufacture

- Fully equipped workshop
- Cut, Bend & Weld
- Experienced team

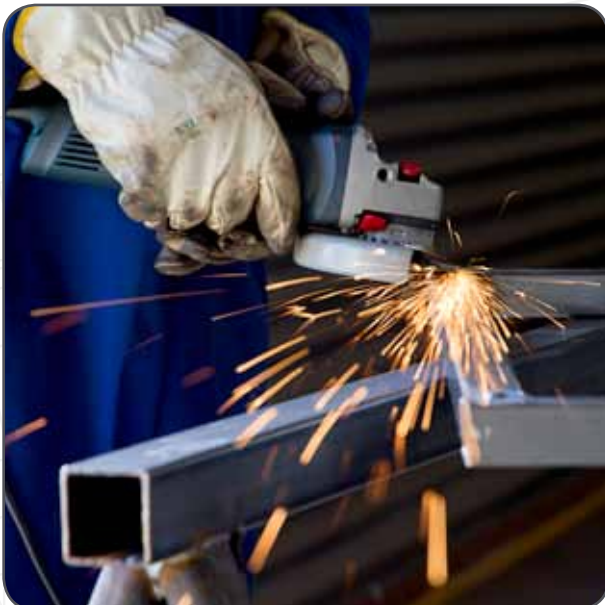

Working off the approved final plans, our highly skilled manufacture team now starts forming the physical product.

Our fully equipped workshop utilises both stock and completely custom elements to ensure the project stays on time, and within your budget.

### Finishing

- Polishing / Etching
- Final Modifications
- Sign Off

If the project requires it, product can be polished to a mirror finish, bead blaster or left raw - depending on the desired look. In addition products can be customised by etching your logo or design into the material itself. Adding that final personal touch.
